

MUNICH PSYCHIATRY LECTURE SERIES

ELSE KRÖNER-FRESENIUS-STIFTUNG
Forschung fördern. Menschen helfen.

SCOTT RUSSO | MSSN, NY, USA

Immune mechanisms of depression

September 26th, 2017

Kraepelin Seminar Room

INGA NEUMANN | U-REGENSBURG

Brain oxytocin:

From social preference to social fear

February 20th, 2018

CHRISTINE FREITAG | U-KLINIK FFM

Autism spectrum disorders: Complex disorders with a complex genetic architecture

October 24th, 2017

Kraepelin Seminar Room

RICHARD MORRIS | EDINB., UK

The making and keeping of memory

March 20th, 2018

GABOR TAMAS | U-SZEGED, HU

What makes us human? Similarities and differences of the human and rodent neocortical microcircuit

November 21st, 2017

ONNO MEIJER | LEIDEN, NL

How cortisol affects the brain for better or worse: Beyond the receptors

April 17th, 2018

HANNAH MONYER | DKFZ

Short- and long-range inhibition in the brain

December 5th, 2017

KARL FRISTON | UCL, UK

The computational anatomy of psychosis

May 22nd, 2018

MICHAL SCHWARTZ | WIS, IL

Systemic immunity protects the mind:

Immunotherapy to combat

Alzheimer's disease

January 23rd, 2018

RAFI MALACH | WIS, IL

What can spontaneous (resting state) fluctuations inform us about human cognitive function and dysfunction

June 19th, 2018

RAFAEL YUSTE | CU, NY, USA

A change in paradigm:

From the neuron doctrine to neural networks

tba

JOSEPH BUXBAUM | MSSN, NY, USA

tba

tba

MAGDALENA GÖTZ | HHZ

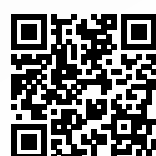

Towards neural repair:

turning scar forming glia into neurons

July 24th, 2018
