

MUNICH PSYCHIATRY LECTURE SERIES 2018-19

HelmholtzZentrum münchen

FABIAN THEIS | HZ MUC
Machine learning in large-scale
single cell genomics

06th June 2019

GOUPING FENG | MIT, USA
Dissecting synaptic and circuitry
mechanisms of psychiatric disorders

25th June 2019

SIMON EICKHOFF | FZ-JUELICH
Looking back to move forward:
Bridging the gap - From large scale
aggregation to individual prediction

12th March 2019

ELIZABETH A. HELLER | UPENN, USA
Chromatin-directed alternative splicing
in brain reward regions

16th October 2018

CATHERINE HARMER | OXFORD, UK
How do antidepressants work?

02nd April 2019

ORLY REINER | WIS, IL
Modelling brain development in
health and disease using
on-chip organoids

16th July 2019

BRENDA PENNINX | VUMC, NL
Personalized medicine in Depression:
Hype or hope?

06th November 2018

RÜDIGER KLEIN | MPIN
Central amygdala circuits that
regulate appetite behavior

29th January 2019

DANNY WEINBERGER | LIBD, USA

tba
tba

KARIN ROELOFS | RU, NL
Neural control of human defensive
reactions to social threat

19th February 2019

KRISTEN BRENNAND | ICAHN, USA
Functional validation of the impact
of rare and common variants
to schizophrenia risk

16th May 2019

VENUE

Lecture Hall | MPI of Psychiatry | Kraepelinstr. 2-10, 80804 Munich

15:00-16:00

Unless indicated differently
